My name is Adam Ali, and I am actively seeking web development roles. I have solid experience with computers, programming, office tasks, and related skills. With a typing speed of over 60 words per minute, I'm confident in my ability to handle tasks that demand efficiency and attention to detail. Overall, I believe I am well-suited for any computer-related position.

I'm also looking for an opportunity to grow and make a long-term contribution to a company's success. Since childhood, I have been passionate about programming and continue to expand my skills. I value stability, continuous learning, and a work environment where I can develop both personally and professionally while helping the team reach its goals. I'm ready to take on new challenges and bring value to your organization.

PROFESSIONAL EXPERIENCE

Frontend Developer - SoloWay (Oct 2020 - Jan 2023)

Ivano-Frankivska Oblasty, Ukraine

- Built websites, applications, and services for clients.
- Designed web layouts, wireframes, and design guides following best practices in Figma.
- Developed front-end interfaces using HTML, CSS, and JavaScript.
- Integrated small and medium-sized libraries, including Bootstrap, to enhance functionality and design.
- Hosted and maintained websites, ensuring security and optimal functionality.

PROJECTS

WebDevZone (Oct 2023 - Feb 2024)

<https://webdevzone.adamaliweb.com>

This is a markdown previewer. On this website, I compile different resources and tips which are publicly accessible. I didn't create the content; I just organized it and put it in one place. This is helpful because I can keep all the information in one place and share it with others.

YouTube Info Gather (Feb 2024 - Mar 2024)

<https://youtubeinfogather.adamaliweb.com>

This website helps you retrieve data from YouTube playlists. It can collect, save, and compare information from videos within a playlist. This is particularly useful because YouTube videos can be unexpectedly deleted, making it challenging to recover them.

EDUCATION

High School Name (2010 - 2012)

Finished high school at Torhovytska NVK in Ukraine, graduating with a gold medal due to my excellent academic performance.

SKILLS

- | | | |
|---------------------------|------------------------|-------------------------------|
